

Civil+Build

ABOUT US

Civil+Build provides a highly experienced management team, skilled personnel in the field and access to a large range of specialist plant and equipment. A complete solution for any of your civil needs.

We place a strong emphasis on performance, quality, teamwork, safety and a "hands-on" management approach. Civil+Build can be relied upon to keep delivering.

Our team of project managers, quantity surveyors and support staff are committed to working closely with you to fulfil all your project requirements and guarantee remarkable results.

BRAND DNA

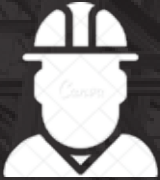

We have a collaborative team approach to the design and build process that helps form and maintain positive working relationships. We strive to develop innovative, value-added solutions whilst maintaining an efficient and quality project.

We strive to exceed the expectations of the people we work with. We go above and beyond to make a positive impact on everything we do.

We endeavour to bring environmental, social and economic benefits to our clients, personnel and the wider community.

OUR SERVICES

Civil Construction

Our team has completed a broad range of civil construction, from house pads and driveways to basement excavation and landscaping, to carpark construction and foundation works.

Demolition

We can handle all types of demolition, from small to large, of varying complexity. Our experienced project team will ensure that demolition works are carried out safely, and with minimum disruption.

Utilities and Drainage

Civil+Build can help with your power, communications, and three waters requirements. We utilize procedures such as hydro excavation to ensure existing services are protected.

Marine

Our expertise includes construction and maintenance of wharves and marine structures.

Structures

Our Project Management team has a strong background in concrete and steel structure construction.

Earthworks and Retaining Structures

We have significant experience performing bulk earthworks, completing geotechnical improvements including shear keys, gully drainage, fill stabilization, undercuts, palisade walls, drainage blankets, and geotextile installation.

Roading

Our services include construction of road earthworks, pavement construction, and associated civil structures.

VALUES & COMMITMENT

Health and Safety

All health and safety regulations and procedures are strictly adhered to, ensuring the safety of everyone in and around our sites. Our policies are designed to ensure all staff and stakeholders return home safe.

People

Our people are our strength. We are committed to providing exceptional opportunities for employees to develop their careers and achieve their full potential.

Environmental

We aim to minimize the effects of the construction process on the environment, and ensure procedures are implemented to avoid any negative impact.

Quality

We aim to complete the job only once and to an exceptionally high standard. We want to ensure the end result is a project that our clients as well as ourselves can be proud of.

Sustainability

We are dedicated to making our office and job sites sustainable and improve the built environment by "Practising Green." We believe green construction is not only good for the environment but also for clients, stakeholders and the community.

Programme

We execute detailed programmes on all our projects, ensuring that any possible delays can be identified early and any potential time savings are implemented.

THE TEAM

We have a team of Project Managers, Supervisors, and Foremen to ensure your project is completed on time, on budget, and to specification. We supplement our project team with Commercial Managers, Office Managers, Health and Safety and Accounts Personnel. This ensures that our project teams can focus on completion, whilst being able to utilise our support functions.

LIAM O'KEEFFE GENERAL MANAGER

Liam has exceptional contract management skills and a proven track record in delivering to clients' expectations and contract specifications. His design and build project experience enables him to approach each project with a comprehensive understanding of requirements and effective construction methods.

His commitment to achieving efficiencies is evident in his value engineering options he provides to clients; where possible, to achieve whole of life cost improvements. Liam offers comprehensive technical skills, particularly in bulk earthworks, roading, structural and concrete construction. He is also experienced in rail infrastructure, bridges, marine works, demolition and piling.

Liam possesses sound understanding of health, safety and environmental legislative obligations (Resource Management Act, Resource Consent conditions and Health and Safety at Work Act); and ensures that works are completed according to site specific safety plans.

Liam will be the first point of contact for your project and he is responsible for the overall quality of project delivery and ensuring that effective HSQE management systems are in place which manages risks and supports successful project delivery.

Civil+Build

Liam is a skilled and experienced project and Operations Manager with over 14 years' experience in Ireland and NZ.

He possesses proven skills in project management, and has successfully delivered several high profile projects including:

- Sistema Factory Construction
- Diversey Lane Earthworks and Civils
- Silo Park and Westhaven Promenade for Panuku Waterfront Auckland
- Dominion Road Cycle Routes and Electrical Multiple Unit (EMU) Projects for Auckland Transport
- Orakei Road Bridge Replacement Kiwi Rail and North-South Junction Tunnel Lowering
- SH20-SH1 Southern Corridor Improvement Project for NZTA
